

Objectives

After completing this lab, you will be able to use the PostgreSQL CLI and pgAdmin to:

- Restore a full database from a backup
- Update a database and perform a full backup
- Drop a database and then restore it

Aim: the PostgreSQL Command Line Interface (CLI) to restore a full database from a backup. Then using a combination of the CLI and pgAdmin, which is a Graphical User Interface (GUI) for PostgreSQL, you will make some changes to this database and perform a full backup. Finally, you will then delete this database to practice a full restoration in the scenario of an accidental deletion.

\dt for checking restored demo database

List of relations

Schema	Name	Type	Owner
bookings	aircrafts_data	table	postgres
bookings	airports_data	table	postgres
bookings	boarding_passes	table	po:

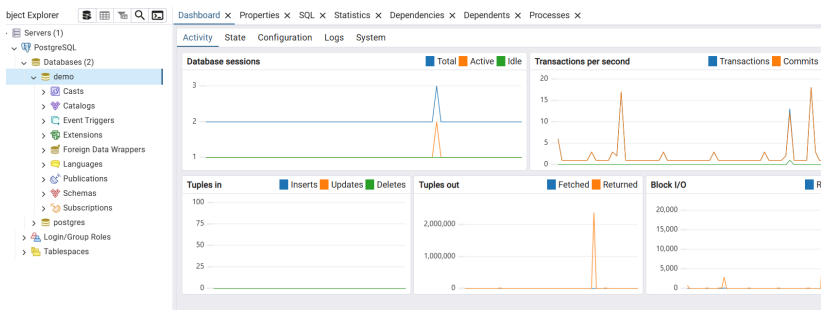

demo=# SELECT * FROM aircrafts_data;

aircraft_code	model	range
773	{ "en": "Boeing 777-300" }	11100
763	{ "en": "Boeing 767-300" }	7900
SU9	{ "en": "Sukhoi Superjet-100" }	3000
320	{ "en": "Airbus A320-200" }	5700
321	{ "en": "Airbus A321-200" }	5600
319	{ "en": "Airbus A319-100" }	6700
733	{ "en": "Boeing 737-300" }	4200
CN1	{ "en": "Cessna 208 Caravan" }	1200

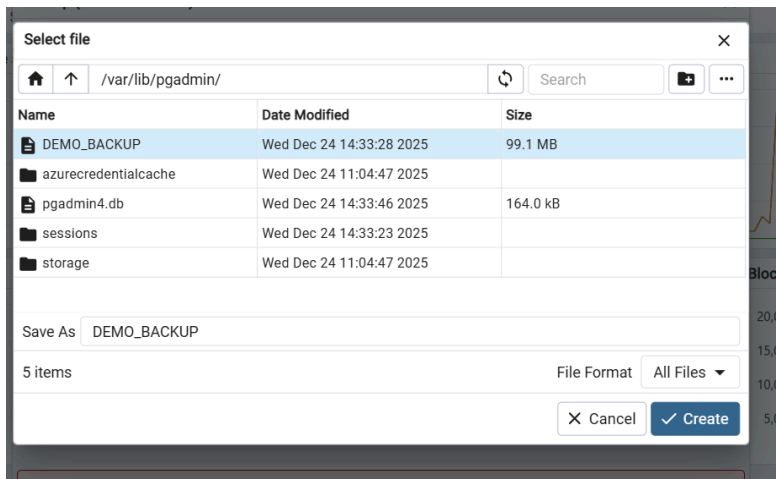

Load data

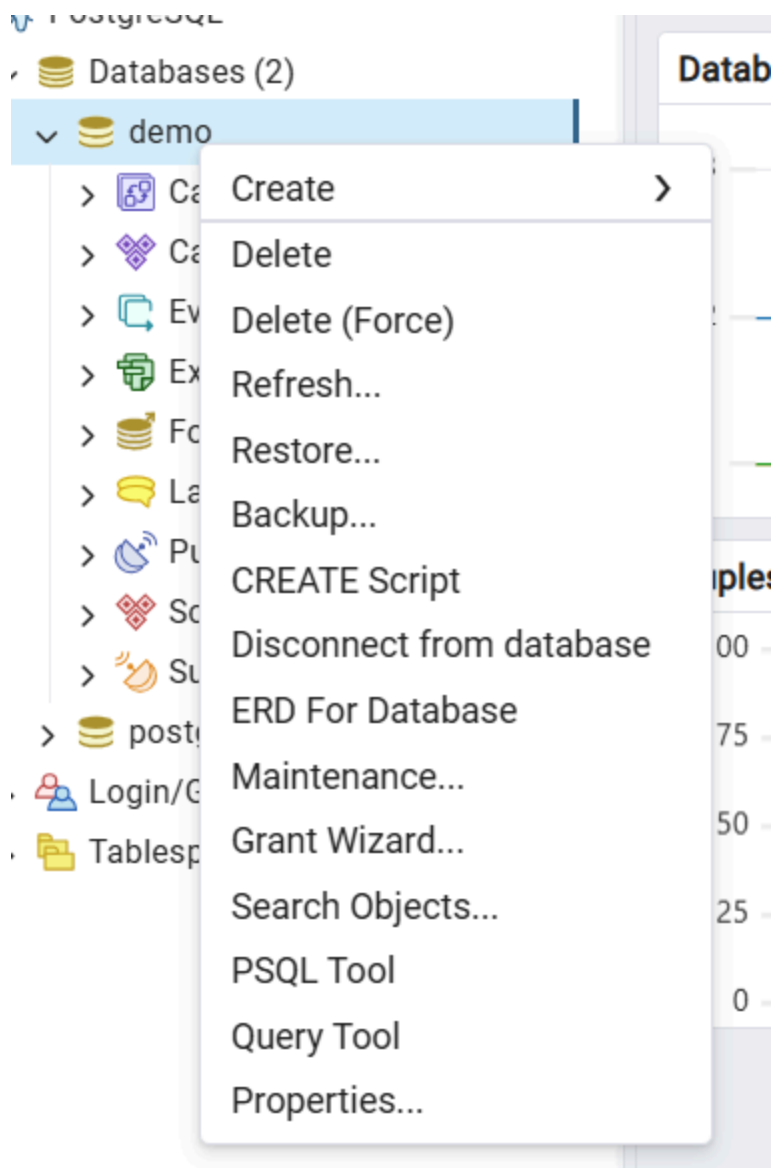

demo=# INSERT INTO aircrafts_data(aircraft_code, model, range) VALUES (380, '{ "en": "Airbus A380-800" }', 15700);
INSERT 0 1

PG-ADMIN

Database > backup

Delete.

Task B: Restore the Database using the Full Backup

Create database and restore demo database with left click “restore”. And connect demo_restore

```
postgres=# \connect demo_restore
psql (14.19 (Ubuntu 14.19-0ubuntu0.22.04.1), server 13.2)
You are now connected to database "demo_restore" as user "postgres".
```

To set the proper search path for your database

```
demo_restore=# SELECT pg_catalog.set_config('search_path', 'bookings', false);
set_config
```

```
-----
bookings
(1 row)
```

Check restore database

```
demo_restore=# \dt
      List of relations
 Schema |      Name      | Type | Owner
-----+-----+-----+-----
bookings | aircrafts_data | table | postgres
bookings | airports_data  | table | postgres
bookings | boarding_passes | table | postgres
bookings | bookings       | table | postgres
bookings | flights        | table | postgres
bookings | seats          | table | postgres
bookings | ticket_flights | table | postgres
bookings | tickets        | table | postgres
(8 rows)
```

```
demo_restore=# SELECT * FROM aircrafts_data;
```

aircraft_code	model	range
